

Measurement Matters Symposium

Wednesday 24 February

Bringing together the global analytical science community

Join us online for a day of expert insight and conversation

Our multi-stream agenda will spotlight both emerging trends and topics of consistent interest to the research and analytical science community around the globe, with panel sessions of international experts, presentations and case studies focused on key issues, and innovative poster sessions.

Wherever you are

Our free-to-attend digital symposium will bring together audience and speakers from across the world to cover topical laboratory and regulatory issues relevant to many global markets. With sessions scheduled throughout the day, you can join the discussion live, whether you're in London, Berlin or San Francisco.

The day's agenda will include sessions on:

The evolution of regulation and testing in the cannabis & cannabinoids market

Worldwide food fraud and authenticity challenges

Synthetic cannabinoids for pharmaceutical research

Global traceability and accuracy in pharmaceutical testing

Proficiency testing for the detection of SARS-CoV-2

Another new normal: Nitrosamine testing for pharmaceutical products

Ensuring the quality of extra virgin olive oil

Identifying unusual pharmaceutical impurities: Two case studies

...and more!

Join the conversation on social and submit your questions in advance for our expert speakers - look for the [#MeasurementMatters2021](https://twitter.com/MeasurementMatters2021) hashtag to get involved!
